

NOTE: DASHED LINE INDICATES MODIFICATION TO WIRING LOOM
 FOR IVA REGULATIONS THE FOG LAMP CAN ONLY COME ON WITH THE DIPPED/MAIN BEAM LIGHTS LIT.
 THERE ARE TWO WAYS TO ACHIEVE THIS CHANGE - 1. STRIP ALL WIRING BACK TO FUSE BOX AND REWIRE POWER TO FUSE D3
 2. CONNECT AN INLINE FUSE BETWEEN THE WIRE COMING FROM THE LIGHT SWITCH TO THE POWER TERMINAL ON THE FOG LAMP SWITCH

TIGER CAT E1 LIGHTING CIRCUIT
